

# Introvit

*Multivitamin injection*

*Ideal for the prevention and treatment of  
vitamin and mineral deficiencies*

# Introvit

Solution for parenteral administration

**Vitamin A is involved in the process of formation and preservation of function of epithelial tissues and mucous membranes, is important for fertility and is essential for vision.**

**Vitamin D<sub>3</sub> regulates and corrects calcium and phosphate metabolism in blood and plays an important role in the uptake of calcium and phosphate from the intestines. Especially in young, growing animals vitamin D<sub>3</sub> is essential for the normal development of skeleton and teeth.**

**Vitamin E is as a fat-soluble intracellular antioxidant, involved in stabilising unsaturated fatty acids, thereby preventing toxic lipo-peroxides formation. Furthermore, vitamin E protects the oxygen-sensitive vitamin A from oxidative destruction in this preparation.**

**B vitamins are essential for the proper operation of several physiological functions.**

## CONTAINS PER ML

Vitamin A, retinol-palmitate .....	15 000 IU.
Vitamin D <sub>3</sub> , cholecalciferol .....	7 500 IU.
Vitamin E, α-tocopherol acetate .....	20 mg.
Vitamin B <sub>1</sub> , thiamine hydrochloride .....	10 mg.
Vitamin B <sub>2</sub> , riboflavine sodium phosphate .....	5 mg.
Vitamin B <sub>6</sub> , pyridoxine hydrochloride .....	3 mg.
Vitamin B <sub>12</sub> , cyanocobalamin .....	60 µg.
D-panthenol .....	25 mg.
Nicotinamide .....	50 mg.
Folic acid .....	150 µg.
Biotin .....	125 µg.
Choline chloride .....	12.5 mg.
Amino acids .....	12 mg.

## INDICATIONS

Introvit is a well balanced combination of essential vitamins and amino acids for cattle, goats, sheep and swine. Introvit is used for:

- Prevention or treatment of vitamin or amino acid deficiencies in farm animals.
- Prevention or treatment of stress (caused by vaccination, diseases, transport, high humidity, high temperatures or extreme temperature changes).
- Improvement of feed conversion.

## DOSAGE

For subcutaneous or intramuscular administration.

Cattle	: 10 - 15 ml.
Goats and sheep	: 5 - 10 ml.
Swine	: 2 - 10 ml.

## PACKAGING

Vial of 50 and 100 ml.
